SUMMARY

Innovative and results-driven **Software Developer** with proven expertise in architecting scalable, high-performance web and mobile applications for federal, commercial, and public sector clients. Expert in the **JavaScript/TypeScript ecosystem** (React, Next.js, Node.js, React Native) with specialized mastery in **3D visualization** (WebGL, Three.js) and geospatial mapping. Adept at bridging complex front-end interfaces with resilient back-end infrastructure and customizing **Strapi APIs** for headless CMS solutions to drive operational efficiency. Bilingual (English/Spanish) leader recognized for managing the full software development lifecycle and delivering high-quality results for environments with over **20,000 daily users**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++, HTML/CSS

Backend & API: Node.js, Express.js, NestJS, Strapi (Headless CMS), RESTful APIs, Microservices, Prisma

3D & Visualization: Three.js, WebGL, React Three Fiber, Deck.gl, Mapbox GL, Gaussian Splatting

Frontend & Mobile: React.js, Next.js, React Native, Vue.js, Redux, Tailwind CSS

Cloud & Database: AWS (SDK/S3/EC2), Vercel, PostgreSQL, MySQL, MongoDB, SQL Server

Engineering Tools: Git, Docker, Vitest, Jest, Postman, Agile (SCRUM), Linux/UNIX

WORK EXPERIENCE

Senior Software Developer

Jan. 2025 – Jan. 2026

MeshMap

- Architecting advanced **3D visualization pipelines** for real-time exploration of cloud-native infrastructure using **React Three Fiber** and **WebGL**.
- Engineered high-fidelity rendering systems for **Gaussian Splatting** and point clouds, optimizing client-side asset processing for complex datasets.
- Leading the integration of geospatial layers via **Deck.gl** and **Mapbox GL** to enhance infrastructure topology and mapping capabilities.
- Orchestrating cloud storage and asset delivery via **AWS SDK** to ensure high-performance data retrieval for global infrastructure exploration.

Lead Developer

2022 – 2024

Techno & Logic Corp

- Directed full-stack engineering for a cross-platform tourism ecosystem supporting **5,000+ daily users** across Web, iOS, and Android.
- Architected a scalable **Node.js backend** and integrated customized **Strapi** solutions to streamline multi-platform content delivery.
- Optimized application performance and database indexing in **PostgreSQL**, leading to a significant reduction in API latency.
- Collaborated with cross-functional teams to align technical architecture with high-level business objectives and user-centered goals.

Front-End Developer

Feb. 2021 – Apr. 2022

DigheonTech Inc.

- Engineered and launched **Travelsafe**, a mission-critical web application and digital traveler statement system for pandemic monitoring, serving **20,000+ daily active users**.
- Developed complex state management and secure data entry forms using **Redux** to maintain accurate histories of incoming passengers for public health records.
- Optimized front-end performance and accessibility to ensure 100% compliance with federal health mandates and seamless UX under high-traffic conditions.
- Integrated secure traveler statements with government infrastructure to ensure real-time data integrity for domestic and international transit.

Full Stack Developer

2020 – 2021

Science, Technology & Research Trust

- Engineered a virtual laboratory for real-time vector surveillance and monitoring, utilizing **React** and **Node.js** for mosquito identification tracking.

- Administered relational database systems in **SQL Server** and **PostgreSQL** to handle critical research data securely for public health initiatives.

Software Developer

2018 – 2019

CINCO Engineering

- Developed a Quality Risk Management platform for the life sciences industry utilizing the **MEAN stack** for high-compliance environments.
- Designed secure user authentication protocols and database schemas for complex compliance workflows and risk assessment.

RESEARCH & PROJECTS

Bioinformatics Researcher

2016 – 2017

- Researched genomic sequence optimization using weighted finite-state transducers at the Medical Science Campus.
- pyfst: OpenFst in Python
- OpenFst: C++ Library
- Worked development environment: linux ubuntu 14.04

Codetrotters Scholar | *Full Stack Development Mentorship*

2017

- Selected for intensive mentorship focused on high-concurrency Node.js and Express.js architecture.

EDUCATION

Interamerican University

Bachelor of Science in Computer Science

Metropolitan Campus

Graduated 2019
